Technical Feedback on the demonstrated technologies

Sl. No	Crop	Feed Back
1	Maize	As Kalinga Raj is a HYV, so farmers can increase area under this variety
2	Chilli (Anthracnose)	As disease fruit percentage is lower so farmers can adopt this technology
3	Tomato	Arka Rakshak fruit is oval shape but round shape fruit are preferred in local market
4	Rice (False Smut Disease)	Seed treatment with Carbendazim and application of Trifloxystrobin + Tebuconazole decreased the disease
5	Humidity management in PS mushroom	As it is low cost technology, well adopted by mushroom farmers
6	Chilli (LCV)	As Arka Sanvi is a Leaf curl virus tolerant variety, so farmers adopted this variety
8	Pickle from oyster mushroom	Fetching good income, keeping quality, taste, and flavor are appreciable.
9	Fodder CO4	Improved milk production, reduction in production cost
10	Bypass fat feeding dairy cows	High value of milk, Market acceptability increased, Reduced body wt loss
11	Goat/small ruminant (Dietary supplementation of mineral mixture)	Productivity: 29% increase body wt, Profitability: Increased (93.7%) Mortality, Morbidity reduced
12	Pro-biotics in poultry feed	Lower incidence of diarrhea, increased FCR
13	Tuberose cultivation	No. of floret per spike in demo is more (32.4). so farmers can adopt this variety.
15	Cowpea (Arka Mangala)	Cowpea var. Arka Mangala recorded more no. of pods/plant, fruit length and less YMV infection resulting higher yield
